

# HAWKSOFT 6 RELEASE NOTES

Released 12/05/2024

Category	Type	Release Notes
Accounting	Bug	Fixed an issue that would cause the pay method summary to not show the bank totals.
Commissions	Enhancement	Entering a manual commission transaction is now more streamlined, making it faster and easier to create transactions.
Data Replace	Enhancement	Carrier may now be updated on policies in bulk using data replace in Quick Reports.
Downloads	Bug	Fixed issue causing "%" deductibles to not be imported from Commercial Property downloads.
Logs	Enhancement	Updated viewing a log with appends to be easier to read.
Submissions	Bug	Corrected an issue where changing a Submission to a different group didn't actually change the group, and where updating the Underwriter could sometimes fail.
Tasks	Enhancement	When editing a Task, in order to reduce accidentally adding a description in lieu of a log note, the description and time will not be displayed unless the description or time are already filled in.
Tasks	Enhancement	While viewing or editing a task on a client, you can now append to an existing log note. This gives users the option to quickly update a task without creating another log.
Tasks	New Feature	The Closure Notes field has been removed from tasks, as users may now simply add a log or append to an existing log. Closure notes on prior tasks can still be viewed on the task history.
