HAWKSOFT 6 RELEASE NOTES

Released 02/13/2025

Category	Type	Release Notes
Accounting	Enhancement	Added a retained commission calculator when creating invoices.
Downloads	Enhancement	Added support for Mercury Memos to be split into individual files and attached automatically to a policy with a matching policy number.
Certificates	Bug	Fixed issue causing items in the Certificate Document Library to still be visible after the attachment has been archived.
ACORD Forms	Bug	Blank ACORD Forms saved to the Windows file system prior to HS6 migration can now be opened in HawkSoft 6.
Email	Bug	Resolved an issue with single-office agencies using E-Signature templates which referred to Agency information.
Data Importer	Bug	Data Importer process now displays an informative error message if Quoted Premium amount is greater than 999,999,999.99. User has a choice to proceed or cancel process.
CMS	Bug	Fixed an issue that would cause two actions of "Send Text" to be saved to a log when sending a text message via the action menu.
ACORD Forms	Enhancement	Added state ID cards for Hawaii, Idaho, Indiana, Maine, Nevada and Vermont.
Search	Enhancement	Progress dialog with a spinner is displayed to indicate that search is processing. User is able to cancel the search if it is taking too long.
