# HAWKSOFT 6 RELEASE NOTES

**Released 02/20/2025**

| Category | Type | Release Notes |
|---|---|---|
| Accounting | Enhancement | Added additional columns of data to Customer Accounting Reports (Customer balance, Unapplied credit, and invoice reports) |
| Agency Setup | Bug | Fixed an issue where a user converted to a Tracking Only user does not display on user drop-downs (Producer, CSR, Agent 1, etc.) on the Edit screens. |
| Commissions | Enhancement | Added the ability to select Shift + Click to select multiple transactions during the Agent Payout workflow. |
| Reporting | Enhancement | When running a Quick Report for All Clients or Active Clients, there is now an option to select the desired Client Type before creating the report. This allows users to run a report faster for only a subset of clients by type. |
| Submissions | Enhancement | Users will now have a Log generated or appended for all actions related to submissions. |
| CMS | Enhancement | The Scratch pad will now remember the last used "Always on Top" setting. |
| ACORD Forms | Enhancement | Added the ability for users to copy certificate holders in the Certificate of Insurance wizard. |
| Search | Enhancement | Middle Name is now displayed in Search Results. |
| Email | Bug | Fixed issue that resulted in CMS freezing when replying to or forwarding an email. |
| CMS | Enhancement | Updated the error message that appears when attempting to add a new contact without associating it with a person. |
| HawkLink | Bug | Fixed issue causing HawkLink for Google Chrome to not launch properly on Windows Remote Desktops. |
