

HAWKSOFT 6 RELEASE NOTES

Released 02/27/2024

| Category | Type | Release Notes |
|----------------|-------------|---|
| Downloads | Bug | Fixed issue causing an error when saving Download Configuration Rules. |
| Logs | Enhancement | When creating a log from Action Menu > Log, Quick Log, or Appending a log, it now saves the creation date and time at the start of the workflow rather than at the end. |
| Reporting | Enhancement | If you run an Activity Tag Report, select a row, and double-click, the associated log will now launch in HawkSoft. |
| Submissions | Enhancement | No fields will be required when creating a new submission. Additionally, carrier will be cleared when copying a submission. |
| Tasks | Enhancement | Reportable actions are now created when Tasks are Closed, Edited, or Reopened. |
| Tasks | Enhancement | A new "Customize View" button in My Tasks allows users to change the number of days displayed in the "Next 7 Days" view, and to create a customized view for any date range of up to 30 days. This provides more flexibility in viewing upcoming tasks. |
| CMS | Bug | HawkSoft now converts all "short form" dates in Windows to the American standard (MM/DD/YYYY). |
| User Interface | Enhancement | Added ability to adjust your default client view zoom level by using Ctrl "+" / "-" keys. |
| CMS | Bug | Corrected an issue that would cause the edit window to reset to the policy information tab after adding a location, vehicle, watercraft or claim. |
| CMS | Enhancement | Added a new warning message and error log entry when an executable file is missing when HawkSoft starts. |
| Change Forms | Bug | Fixed issue causing Location Numbers to not appear on the Change Form when modifying Buildings on a Location. |
| Integrations | Bug | Fixed issue with Boston Software integration when bridging Auto policies. |

| Category | Type | Release Notes |
|----------|-------------|---|
| HawkLink | Enhancement | Added support for launching HawkLink with Microsoft Edge. |
